

Nickel Sulfate

Overview

SMM's high-purity nickel, "Fine Emerald" is suitable for all types of nickel plating including electrolytic plating and electroless plating. It can also be used for a wide array of purposes other than plating, such as aluminum coloring, catalysts, and battery materials.

Quality characteristics

Ni	Co	Cu	Fe	Mn	Pb	Zn	Mg	Na
≥22.0	≤0.001	≤0.0001	≤0.0001	≤0.0001	≤0.0001	≤0.0001	≤0.01	≤0.002

Characteristics

1. Electrolytic nickel plating and electroless nickel plating
2. Battery materials
3. Aluminum coloring

Packaging

1. 3-ply kraft paper bag, with 1 inner polyethylene plastic, 20 kg per bag
2. Flexible containers of various types
